

**MINIMALIST BASIC  
PHOTOGRAPHER**

## **IMAGE ANALYZER**

---

- Does this image have a clear focus and can I articulate what that is?
- Is everything well balanced or is there anything that is slightly off; focus, centering, horizon lines, etc.?
- Is there anything in my photograph that doesn't really add to the shot; objects, color, composition, depth of field, etc.?
- Are there any mergers; near mergers, edge mergers, weird cropping, etc.?
- Do the lines in my images lead the viewer into the picture and keep them there, or do they lead me right out of the picture?
- Was this a vertical shot that I should have shot horizontally or vice versa?
- Was my point of view a good choice or could I have chosen something better?
- Are there any bright or dark regions that are distracting?
